Dear Juniper Hiring Team,

I hope your day is going well! My name is Alex Pinette, and I am a junior studying Computer Science at Wheaton College (MA). I am very interested in working for your company this summer. Your commitment to staying true to your core values of honesty, integrity, and respect at Juniper inspires me! The products you build and the values you stand for make Juniper seem like an ideal workplace for me.

A little about me. I have previously completed a Software Engineering internship with P3 Software, where I learned the back-end website architecture of the company's website. I became familiar with the tools used for code management such as, making commits, pull requests, pushes, merges, etc. in BitBucket and Jira through Atlassian. One of my favorite projects that I have worked on is a group project I completed during my Mobile Computing class at Wheaton. While working on this project, I worked together with a team of four students to create a Wheaton student-app from scratch in Android Studio using Java. I was able to use my programming skills to write custom features for the app, but also use my design skills to plan out the layout of the app. Our goal was for the students to have a seamless user experience!

Please let me know if there is anything else you need from me. I look forward to hearing from you! I can be reached at (508)-282-2302 or pinette_alex@wheatoncollege.edu.

Best regards,

Alex Pinette
